

# HEART & EAGLE BAT HOUSE

## Mounting Instructions

Heart & Eagle products are made from recycled century old barn wood. They are heavy.  
When mounting these products, extra caution must be taken.  
Two ladders and an assistant is a good way to go.

- Made from Reclaimed century-old barn wood
- Researched for native species of bats
- Waterproofed with safe Marine varnish
- Hang in full sun, 12'-15' high.
- Best locations are: a gable, shed, or pole

*Bats are flying mammals. Some eat as many as three thousand mosquitoes a night. Bat houses should receive at least six hours of sunlight per day. East or South facing locations are ideal.*

*Ideal for two species, Little and Big Brown Bats.*

- 1 Drive in a 3" galvanized screw, and suspend bat house
- 2 Check bat house for plumb and drive in second 3" galvanized screw
- 3 Drive in third 3" galvanized screw.
